Python developer passionate about AI and automation.

Experienced in building real-world command-line and desktop applications using frameworks and libraries like Django, Tkinter, and BeautifulSoup.

Certified in Harvard's CS50x course and trained in Python professionally.

Worked on several solo and collaborative projects, turning practical ideas into code.

Projects

Resume Parser & Job Title Recommender

Parses resumes and recommends matching job titles using NLP.

Python, spaCy, FuzzyWuzzy, Text Processing

<https://github.com/hadidadashzade/resume-parser-project>

AI Daily Planner

Smart desktop task planner with AI suggestions — built using Tkinter.

Python, AI, Tkinter, Productivity

<https://github.com/hadidadashzade/ai-daily-planner>

Invoice Generator CLI

A professional tool to generate PDF invoices from Excel — ideal for freelancers and small businesses.

Python, CLI, PDF, Automation, Excel

<https://github.com/hadidadashzade/invoice-generator-cli>

Web Scraper CLI

A simple CLI app to scrape remote jobs from remoteok.com and save in JSON/CSV.

Python, BeautifulSoup, Requests, CLI

<https://github.com/hadidadashzade/web-scraper-cli>

AI Flashcards

Command-line flashcards with spaced repetition and fuzzy matching. Final project for CS50x.

Python, CLI, AI, Learning tool
